# **BACKGROUND**

# Description

TNFSF8, also known as tumor necrosis factor ligand superfamily member 8, is a type II membrane protein

# Recombinant human CD30 Ligand/TNFSF8 protein

Catalog Number: ATGP3343

belonging to the TNF superfamily. It is expressed on the cell surface of activated T cells, B cells, and monocytes. CD30/TNFRSF8 ligation by TNFSF8 mediates pleiotropic effects including cell proliferation, activation, differentiation and cell death by apoptosis. Recombinant human TNFSF8, fused to His-tag at C-terminus, was expressed in insect cell and purified by using conventional chromatography techniques.
