# NKMAXBIO We support you, we believe in your research

# **Human CEBP beta/CEBPB antibody**

Catalog Number: ABP0609

### **PRODUCT INFORMATION**

# Catalog number

ABP0609

#### Clone No.

47A1

## **Product type**

Monoclonal Antibody

#### UnitProt No.

P17676

#### **NCBI Accession No.**

NP 005185

#### **Alternative Names**

CCAAT/enhancer-binding protein beta, Liver activator protein, LAP, liver-enriched transcriptional activator protein, Liver-enriched inhibitory protein, LIP, Nuclear factor NF-IL6, NFIL6, Transcription factor 5, TCF-5, Interleukin 6-dependent DNA-binding protein, IL6DBP, CRP2

# **PRODUCT SPECIFICATION**

#### **Antibody Host**

Mouse

## **Reacts With**

Human

### Concentration

1mg/ml (determined by BCA assay)

#### **Formulation**

Liquid in. Phosphate-Buffered Saline (pH 7.4) with 0.02% Sodium Azide, 10% glycerol

#### Immunogen

Recombinant human C/EBP-beta (1-271 aa) purified from E. coli

### Isotype

IgG1 kappa

#### **Purification Note**

By protein-G affinity chromatography

#### **Application**

ELISA, WB, ICC/IF

## **Usage**

The antibody has been tested by ELISA, Western blot and ICC/IF analysis to assure specificity and reactivity. Since application varies, however, each investigation should be titrated by the reagent to obtain optimal results.

# NKMAXBIO We support you, we believe in your research

# **Human CEBP beta/CEBPB antibody**

Catalog Number: ABP0609

#### **Storage**

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

# **BACKGROUND**

# **Description**

CCAAT/enhancer-binding proteins (C/EBPs) are a family of basic leucine zipper (bZIP) DNA binding proteins that play important roles in normal cellular differentiation and function in a variety of tissues. The C/EBP family is critical for innate immunity and inflammatory response, and consists of five core members: C/EBPalpha, C/EBPbeta, C/EBPdelta, C/EBPepsilon, and C/EBPgamma. Among these proteins, C/EBPbeta is usually highly expressed in liver, intestine, lung and adipose. C/EBPbeta has three isoforms, two activator, (LAP\* and LAP) and a repressor (LIP). These isoforms are differentially translated from the same mRNA. The expression of these isoforms is developmentally and hormonally regulated.

# **DATA**

### Western blot analysis (WB)

The cell lysate (40ug) was resolved by SDS-PAGE, transferred to PVDF membrane and probed with anti-human C/EBP-beta antibody (1:1000). Proteins were visualized using a goat anti-mouse secondary antibody conjugated to HRP and an ECL detection system. Lane 1.: 293T cell lysate

Immunocytochemistry/Immunofluorescence (ICC/IF)

# **Human CEBP beta/CEBPB antibody**

Catalog Number: ABP0609

ICC/IF analysis of C/EBP-beta in HaLa cells. The cell was stained with ABP0609 (1:100). The secondary antibody (green) was used Alexa Fluor 488. DAPI was stained the cell nucleus (blue).
