PRODUCT INFORMATION

Catalog number AMB0710

Clone No. 10C12

Product type Monoclonal Antibody

UnitProt No. POAEX9

NCBI Accession No. NP_418458.1

Alternative Names

ZCSL3, MMBP, MBP, Maltose binding protein, Maltodextrin-binding protein, malJ, malE, JW3994, JJJ3, Escherichia coli MBP, ECK4026, E.coli MBP, DPH4, Cytoplasmic maltose-binding protein

PRODUCT SPECIFICATION

Antibody Host

Mouse

Concentration 1mg/ml (determined by BCA assay)

Formulation

Liquid in. Phosphate-Buffered Saline (pH 7.4) with 0.02% Sodium Azide, 10% glycerol

Immunogen

Recombinant MBP purified from E. coli

lsotype

lgG1 kappa

Purification Note By protein-A affinity chromatography

Application

ELISA, WB

Usage

The antibody has been tested by ELISA and Western blot analysis to assure specificity and reactivity. Since application varies, however, each investigation should be titrated by the reagent to obtain optimal results.

Storage

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

Epitope tagging offers an easy and universal strategy for the identification and purification of proteins derived by recombinant DNA technology. The insertion of a Maltose Binding Protein (MBP) tag creates a stable fusion product that does not interfere with the bioactivity of the protein or with the biodistribution of the MBP tagged product.

DATA

Western blot analysis (WB)

The recombinant proteins (50ng) were resolved by SDS-PAGE, transferred to PVDF membrane and probed with anti-human MBP antibody (1:1000). Proteins were visualized using a goat anti-mouse secondary antibody conjugated to HRP and an ECL detection system. Lane 1.: MBP-tagged WLS protein(58.9kDa) Lane 2.: MBP-tagged IRF7 protein(59.3kDa)
