NKMAXBiO we support you, we believe in your research Human Retinol Binding Protein 4/RBP4 antibody Catalog Number: ATGA0136

### **PRODUCT INFORMATION**

Catalog number ATGA0136

Clone No. AT2B4

Product type Monoclonal Antibody

**UnitProt No.** P02753

NCBI Accession No. NP\_006735

Alternative Names Plasma retinol-binding protein, PRBP, RBP

### **PRODUCT SPECIFICATION**

Antibody Host Mouse

Reacts With Human

Concentration 1mg/ml (determined by BCA assay)

## **Formulation** Liquid in. Phosphate-Buffered Saline (pH 7.4) with 0.02% Sodium Azide, 10% glycerol

Immunogen Recombinant human RBP4 (19-201aa) purified from E. coli

# Isotype

lgG1 kappa

**Purification Note** By protein-G affinity chromatography

### Application

ELISA, WB, ICC/IF, FACS

### Usage

The antibody has been tested by ELISA, Western blot, ICC/IF and FACS analysis to assure specificity and reactivity. Since application varies, however, each investigation should be titrated by the reagent to obtain optimal results.

#### Storage

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

### BACKGROUND

#### Description

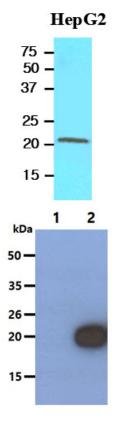

Retinol binding protein 4 (RBP4) belongs to the lipocalin family and is the specific carrier for retinol in the blood. This protein was found to be expressed and secreted by adipose tissue, and was strongly associated with insulin resistance. It delivers retinol from the liver stores to the peripheral tissues. In plasma, the RBP-retinol complex interacts with transthyretin which prevents its loss by filtration through the kidney glomeruli.

### DATA

### Western blot analysis (WB)

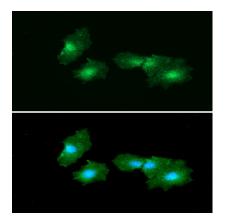

The HepG2 cell lysate (60ug) was resolved by SDS-PAGE, transferred to NC membrane and probed with anti-human RBP4 antibody (1:500). Proteins were visualized using a goat anti-mouse secondary antibody conjugated to HRP and an ECL detection system.

The Cell lysates (10ug) were resolved by SDS-PAGE, transferred to PVDF membrane and probed with anti-human RBP4 antibody (1:500). Proteins were visualized using a goat anti-mouse secondary antibody conjugated to HRP and an ECL detection system. Lane 1.: 293T cell lysate Lane 2.: RBP4 Transfected 293T cell lysate

#### Immunocytochemistry/Immunofluorescence (ICC/IF)

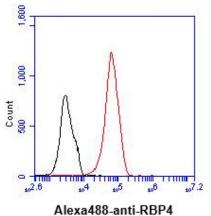

NKMAXBiO we support you, we believe in your research Human Retinol Binding Protein 4/RBP4 antibody Catalog Number: ATGA0136

ICC/IF analysis of RBP4 in Hep3B cells line, stained with DAPI (Blue) for nucleus staining and monoclonal anti-human RBP4 antibody (1:100) with goat anti-mouse IgG-Alexa fluor 488 conjugate (Green).

Flow cytometry (FACS)

Flow cytometry analysis of RBP4 in HepG2 cell line, staining at 2-5ug for  $1\times10^{6}$  cells (red line). The secondary antibody used goat antimouse IgG Alexa fluor 488 conjugate. Isotype control antibody was mouse IgG (black line).
