NKMAXBiO we support you, we believe in your research Human FUS2/NAA80 antibody Catalog Number: ATGA0164

# **PRODUCT INFORMATION**

Catalog number ATGA0164

Clone No. AT2F4

**Product type** Monoclonal Antibody

**UnitProt No.** Q93015

NCBI Accession No. NP\_036323

Alternative Names Protein fus 2, Protein fusion-2, FuS-2, NAT6, N acetyltransferase 6

# **PRODUCT SPECIFICATION**

Antibody Host Mouse

Reacts With Human

Concentration 1mg/ml (determined by BCA assay)

**Formulation** Liquid in. Phosphate-Buffered Saline (pH 7.4) with 0.02% Sodium Azide, 10% glycerol

Immunogen Recombinant FUS2 (1-308aa) purified from E. coli

# Isotype

lgG1 kappa

**Purification Note** By protein-G affinity chromatography

## Application

ELISA, WB, ICC/IF, FACS

## Usage

The antibody has been tested by ELISA, Western blot, ICC/IF and FACS analysis to assure specificity and reactivity. Since application varies, however, each investigation should be titrated by the reagent to obtain optimal results.

#### Storage

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

# BACKGROUND

#### Description

Vertebrate FUS2 genes, which are known to be putative tumor suppressor gene, contain several important domains such as the catalytic N-acetyltransferase (NAT) domain. NAT domain is essential enzymes involved in several sophisticated cellular processes such as N-acetylation, O-acetylatin. NAT enzymes may be involved in susceptibility to cancer including colorectal cancer because of the presence of carcinogenic heterocyclic amines in some cooked foods. FUS2 was physically localized to the cytoplasm. Also, FUS2 showed the actin dependent movement, closely related to the polarization in the budding yeast, Saccharomyces cerevisiae.

# DATA

#### Western blot analysis (WB)

The cell lysates(1ug) were resolved by SDS-PAGE, transferred to PVDF membrane and probed with anti-human FUS2 antibody (1:1000). Proteins were visualized using a goat anti-mouse secondary antibody conjugated to HRP and an ECL detection system. Lane 1.: 293T cell lysate Lane 2.: FUS2 Transfected 293T cell lysate

#### Immunocytochemistry/Immunofluorescence (ICC/IF)

Immunofluorescence of human A549 cells stained with Hoechst 33342 (Blue) and monoclonal anti-human FUS2 antibody (1:500) with Texas Red (red).

## Flow cytometry (FACS)

Flow cytometry analysis of FUS2 in Balb/3T3 cells. The cell was stained with ATGA0164 at 2-5ug for 1x10<sup>6</sup>cells (red). A Goat anti mouse IgG (Alexa fluor 488) was used as the secondary antibody. Mouse monoclonal IgG was used as the isotype control (dark gray), cells without incubation with primary and secondary antibody was used as the negative control (light gray).
