# **PRODUCT INFORMATION**

Catalog number ATGA0203

Clone No. AT2G9

**Product type** Monoclonal Antibody

**UnitProt No.** P01111

NCBI Accession No. NP\_002515

## **Alternative Names**

Neuroblastoma RAS viral (v-ras) oncogene homolog, GTPase NRas, HRAS1, ALPS4, N-ras, NRAS1, NS6, Neuroblastoma RAS viral (v-ras) oncogene homolog OTTMuSP00000023521, AV095280, N ras, N ras protein part 4, Neuroblastoma RAS viral (v ras) oncogene homolog, OTTHuMP00000013879, Transforming protein N Ras, v ras neuroblastoma RAS viral oncogene homolog

### **Additional Information**

Ras Antibody detects endogenous levels of total K-Ras, H-Ras, and N-Ras(cell signaling).

## **PRODUCT SPECIFICATION**

Antibody Host Mouse

Reacts With Human

**Concentration** 1mg/ml (determined by BCA assay)

## Formulation

Liquid in. Phosphate-Buffered Saline (pH 7.4) with 0.02% Sodium Azide, 10% glycerol

## Immunogen

Recombinant human NRAS (1-186aa) purified from E. coli

#### **Isotype** IgG2a kappa

**Purification Note** By protein-G affinity chromatography

# Application

ELISA, WB, ICC/IF, FACS

NKMAXBio we support you, we believe in your research Human pan-RAS antibody Catalog Number: ATGA0203

#### Usage

The antibody has been tested by ELISA, Western blot, ICC/IF and FACS analysis to assure specificity and reactivity. Since application varies, however, each investigation should be titrated by the reagent to obtain optimal results.

#### Storage

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

## BACKGROUND

#### Description

The Ras protein is a subfamily of small GTPases that are involved in signal transduction. They are activated by ligand-binding receptor tyrosine kinases such as EGFR, PDGFR, CSF and FGF. These kinases transiently convert RAS-GDP (inactive form) to RAS-GTP, the active form of RAS. The main genes are HRAS, NRAS and KRAS.

### DATA

#### Western blot analysis (WB)

The cell lysates of 293T(35ug) were resolved by SDS-PAGE, transferred to PVDF membrane and probed with anti-human RAS (1:500~1:5000). Proteins were visualized using a goat anti-mouse secondary antibody conjugated to HRP and an ECL detection system.

The recombinant proteins (200ng) were resolved by SDS-PAGE, transferred to PVDF membrane and probed with anti-human RAS antibody (1:1000). Proteins were visualized using a goat anti-mouse secondary antibody conjugated to HRP and an ECL detection system. ## Immunocytochemistry/Immunofluorescence (ICC/IF)

ICC/IF analysis of RAS in HeLa cells. The cell was stained with ATGA0203 (1:100). The secondary antibody (green) was used Alexa Fluor 488. DAPI was stained the cell nucleus (blue).

Flow cytometry (FACS)

Flow cytometry analysis of RAS in HeLa cell line, staining at 2-5ug for 1x10^6cells (red line). The secondary antibody used goat anti-mouse IgG Alexa fluor 488 conjugate. Isotype control antibody was mouse IgG (black line).
