

Influenza A H1N1 Hemagglutinin antibody

Catalog Number: ATGA0221

PRODUCT INFORMATION

Catalog number

ATGA0221

Clone No.

AT1G7

Product type

Monoclonal Antibody

UnitProt No.

C7RYS4

NCBI Accession No.

ACV04238.1

Alternative Names

hemagglutinin, Influenza A virus (A/New York/3571/2009 H1N1) hemagglutinin, HA

PRODUCT SPECIFICATION

Antibody Host

Mouse

Reacts With

Influenza A

Concentration

1mg/ml (determined by BCA assay)

Formulation

Liquid in. Phosphate-Buffered Saline (pH 7.4) with 0.02% Sodium Azide, 10% glycerol

Immunogen

Recombinant Influenza A-H1N1/HA1 (18-344aa) purified from Baculovirus

Isotype

IgG1 kappa

Purification Note

By protein-G affinity chromatography

Application

ELISA, WB

Usage

The antibody has been tested by ELISA and Western blot analysis to assure specificity and reactivity. Since application varies, however, each investigation should be titrated by the reagent to obtain optimal results.

Storage

Influenza A H1N1 Hemagglutinin antibody

Catalog Number: ATGA0221

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

Influenza virus, an enveloped virus of the Orthomyxoviridae family, has a unique capacity for genetic variation that is based in two molecular features of the virus family. First of all, the surface proteins of the virus are highly variable, able to mutate up to 50% of their amino acid sequence and still perform their functions in infection. Secondly, the viral genome is segmented, with eight RNA segments that are genetically independent of one another. In a mixed infection of different influenza genotypes, these segments can almost randomly reassort resulting in hybrid genotypes with some segments derived from one virus strain, while the other segments are derived from a second strain.

DATA

Western blot analysis (WB)

The recombinant Influenza A-H1N1/HA1 proteins (50ng) were resolved by SDS-PAGE, transferred to PVDF membrane and probed with anti-Influenza A-H1N1/HA1 antibody (1:500). (1:1000), (1:5000). Proteins were visualized using a goat anti-mouse secondary antibody conjugated to HRP and an ECL detection system.

Additional Information

ELISA: H1N1/HA1 Antibody (1ug/ml) specifically recognizes H1N1 recombinant protein, but not interacted H3N2 and H5N1 recombinant protein in ELISA. {ATGA0221-Addpic.jpg}
