# **Human Pontin/RUVBL1 antibody**

Catalog Number: ATGA0423

## **PRODUCT INFORMATION**

## Catalog number

ATGA0423

#### Clone No.

AT1D6

## **Product type**

Monoclonal Antibody

#### UnitProt No.

Q9Y265

#### **NCBI Accession No.**

NP 003698

#### **Alternative Names**

49 kDa TATA box-binding protein-interacting protein, 49 kDa TBP-interacting protein, 54 kDa erythrocyte cytosolic protein, ECP-54, INO80 complex subunit H, INO80H, NMP 238, Nuclear matrix protein 238, Pontin 52, RuvB like AAA ATPase 1, RuvB-like 1, RVB1, TAP54-alpha, TIH1, TIP49a, TIP60-associated protein 54-alpha

## **PRODUCT SPECIFICATION**

#### **Antibody Host**

Mouse

## **Reacts With**

Human

## Concentration

1mg/ml (determined by BCA assay)

## **Formulation**

Liquid in. Phosphate-Buffered Saline (pH 7.4) with 0.02% Sodium Azide, 10% glycerol

#### Immunogen

Recombinant human RuVBL1 (1-456aa) purified from E. coli

## Isotype

IgG2a kappa

#### **Purification Note**

By protein-A affinity chromatography

### **Application**

ELISA, WB, ICC/IF

#### Usage

The antibody has been tested by ELISA, Western blot analysis, Flow cytometry and ICC/IF to assure specificity and reactivity. Since application varies, however, each investigation should be titrated by the reagent to obtain optimal results.

# **Human Pontin/RUVBL1 antibody**

Catalog Number: ATGA0423

## **Storage**

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

## **BACKGROUND**

## **Description**

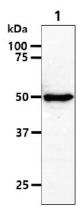

RuVBL1, also known as TIP49A, is a component of the NuA4 histone acetyltransferase complex which is involved in transcriptional activation of select genes principally by acetylation of nucleosomal histone H4 and H2A. This complex may be required for the activation of transcriptional programs associated with oncogene and proto oncogene mediated growth induction, tumor suppressor mediated growth arrest.

## **General References**

## **DATA**

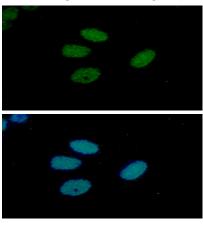

## Western blot analysis (WB)

The cell lysate (40ug) were resolved by SDS-PAGE, transferred to PVDF membrane and probed with anti-human RuVBL1 antibody (1:1000). Proteins were visualized using a goat anti-mouse secondary antibody conjugated to HRP and an ECL detection system.

Lane 1 : Raji cell lysate

## Immunocytochemistry/Immunofluorescence (ICC/IF)

ICC/IF analysis of RuVBL in HeLa cells line, stained with DAPI (Blue) for nucleus staining and monoclonal anti-human RuVBL antibody (1:100) with goat anti-mouse IgG-Alexa fluor 488 conjugate (Green).
