application varies, however, each investigation should be titrated by the reagent to obtain optimal results.

#### **Storage**

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

#### **BACKGROUND**

#### **Description**

Arginase 2 catalyzes the same reaction as arginase 1, but differs in its tissue specificity and subcellularlocation. Specifically, arginase 2 localizes to the mitochondria. Arginase 2 is expressed in non-hepatictissues, with the highest levels of expression in the kidneys, but, unlike arginase 1, is not expressed inliver.

The cell lysate(40ug) was resolved by SDS-PAGE, transferred to PVDF membrane and probed with anti-human ARG2 antibody (1:1000). Proteins were visualized using a goat anti-mouse secondary antibody conjugated to HRP and an ECL detection system.
