PRODUCT INFORMATION

Catalog number ATGA0550

Clone No. c9F2

Product type Monoclonal antibody

UnitProt No. P02489

NCBI Accession No. NP_000385

Alternative Names

Acry-1, Alpha crystallin A chain, CRYA1, CRYAA, Crystallin alpha 1, Crystallin alpha A, Heat shock protein beta 4, HSPB 4, HspB4, Zonular Central Nuclear Cataract

Additional Information

This product was produced from tissue culture supernatant.

PRODUCT SPECIFICATION

Antibody Host Mouse Reacts With Human

Concentration 1mg/ml (determined by BCA assay)

Formulation

Liquid in. Phosphate-Buffered Saline (pH 7.4) with 0.02% Sodium Azide, 10% glycerol

Immunogen

Recombinant human AlphaA Crystallin/CRYAA (1-173aa) purified from E. coli

Isotype IgG1 kappa

Purification Note By protein-A affinity chromatography

Application

ELISA, WB

Usage

The antibody has been tested by ELISA and Western blot analysis to assure specificity and reactivity. Since

application varies, however, each investigation should be titrated by the reagent to obtain optimal results.

Storage

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

alpha-crystallins, a major protein of the ocular lens, are thought to play a role in maintaining lens transparency,which are composed of two gene products alpha-A and alpha-B, for acidic and basic, respectively.alpha-crystallins can be induced by heat shock and are members of the small heat shock protein (sHSP). They actas molecular chaperones and hold unfolded or misfolded proteins in large, water-soluble low molecular weightaggregates. These heterogeneous aggregates consist of 30-40 subunits of the alpha-A and alpha-B subunitshave a 3:1 ratio, respectively. Two additional function of alpha-crystallins are an autokinase activity and theparticipation in the intracellular architecture.

DATA

Western blot analysis (WB)

The recombinant proteins (50ng) were resolved by SDS-PAGE, transferred to PVDF membrane and probed with anti-human AlphaA Crystallin/CRYAA antibody (1:1000). Proteins were visualized using a goat anti-mouse secondary antibody conjugated to HRP and an ECL detection system.
