

LGALSL cDNA

Catalog Number: ATGD0031

PRODUCT INFORMATION

Catalog number

ATGD0031

Product type

cDNA

Species

Human

NCBI Accession No.

NP_054900.2

Alternative Names

GRP, HSPC159

mRNA Refseq

NM_014181.2

OMIM**Chromosome location**

2p14

PRODUCT SPECIFICATION

Formulation

Lyophilized

Storage

Store the plasmid at -20C.

cDNA Size

519bp

Preparation before usage

1. Centrifuge at 7000rpm for 1 minute.
2. Carefully open the vial and add 100ul of sterile water to dissolve the DNA. Each tube contains approximately 10ug of lyophilized plasmid.

Vector description

This shuttle vector contains the complete ORF. It is inseted BamH I to Xho I. The gene insert contains multiple cloning sites which can be used to easily cut and transfer the gene and recombination site into your expression vector.

Cloning Vector

pATGen (puc19-derived cloning vector)

General Description

Galectin-related protein, also known as LGALSL, is a 172 amino acid protein that contains one galectin domain.

LGALSL cDNA

Catalog Number: ATGD0031

Galectins are a family of soluble b-galactoside-binding animal lectins that modulate cell-to-cell adhesion and cell-to-extracellular matrix (ECM) interactions and also play a role in tumor progression, pre-mRNA splicing and apoptosis. However, LGALSL does not appear to bind carbohydrates or lactose because the critical residues required for binding are not conserved
