

## CYCS cDNA

Catalog Number: ATGD0213

### PRODUCT INFORMATION

---

**Catalog number**

ATGD0213

**Product type**

cDNA

**Species**

Human

**NCBI Accession No.**

NP\_061820.1

**Alternative Names**

CYC, HCS, THC4, Cytochrome c

**mRNA Refseq**

NM\_018947.5

**OMIM**

123970

**Chromosome location**

7p15.3

### PRODUCT SPECIFICATION

---

**Formulation**

Lyophilized

**Storage**

Store the plasmid at -20C.

**cDNA Size**

318bp

**Preparation before usage**

1. Centrifuge at 7000rpm for 1 minute.
2. Carefully open the vial and add 100ul of sterile water to dissolve the DNA. Each tube contains approximately 10ug of lyophilized plasmid.

**Vector description**

This shuttle vector contains the complete ORF. It is inseted BamH I to Xho I. The gene insert contains multiple cloning sites which can be used to easily cut and transfer the gene and recombination site into your expression vector.

**Cloning Vector**

pATGen (puc19-derived cloning vector)

**General Description**

**CYCS cDNA**

Catalog Number: ATGD0213

CYCS encodes a small heme protein that functions as a central component of the electron transport chain in mitochondria. The encoded protein associates with the inner membrane of the mitochondrion where it accepts electrons from cytochrome b and transfers them to the cytochrome oxidase complex. This protein is also involved in initiation of apoptosis. Mutations in this gene are associated with autosomal dominant nonsyndromic thrombocytopenia. Numerous processed pseudogenes of this gene are found throughout the human genome.
