pATGen (puc19-derived cloning vector)

General Description

ZNF330 cDNA

Catalog Number: ATGD0451

ZNF330 (Zinc Finger Protein 330) is a novel human gene. The deduced protein sequence significantly showed nine highly conserved CXXC motifs indicative of several putative zinc fingers. Immunolocalization of the protein in culture of mammalian cells indicates an association with the interphase nucleolus and a transient relocation to the mitotic centromeres and the midbody.
