General Description

RPS15 cDNA

Catalog Number: ATGD0473

RPS15 is a ribosomal protein that is a component of the 40S subunit. It belongs to the S19P family of ribosomal proteins. RPS15 is located in the cytoplasm. RPS15 has been found to be activated in various tumors, such as insulinomas, esophageal cancers, and colon cancers. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of RPS15 dispersed through the genome.
