

Recombinant *S. Japonicum* Glutathione S-transferase/GST protein

Catalog Number: GST0801

PRODUCT INFORMATION

Expression system

E.coli

Domain

1-218aa

UniProt No.

P08515

NCBI Accession No.

AAB59203.1

Alternative Names

Glutathione S-transferase class-mu 26 kDa isozyme, GST 26, Sj26 antigen, SjGST

PRODUCT SPECIFICATION

Molecular Weight

26 kDa (224aa)

Concentration

1mg/ml (determined by Bradford assay)

Formulation

Liquid in. Phosphate-Buffered Saline (pH 7.4)

Purity

> 95% by SDS-PAGE

Biological Activity

Specific activity is > 20unit/mg, and is defined as the amount of enzyme that conjugate 1.0 u mole of 1-chloro-2,4-dinitrobenzene (CDNB) with reduced glutathione per minute at pH 6.5 at 25C.

Tag

Non-Tagged

Application

SDS-PAGE, Enzyme Activity

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

Glutathione S-transferase (GST) represents a major group of detoxification enzymes. This enzyme acts by catalyzing the reaction of glutathione with an acceptor molecule to form an S-substituted glutathione (S=sulfur). The reactions utilizing glutathione contribute the transformation of a wide range of compounds, including

Recombinant *S. Japonicum* Glutathione S-transferase/GST protein

Catalog Number: GST0801

carcinogens, therapeutic drugs, and products of oxidative stress. As well as its enzymatic activities, GST may also bind toxins and function as transport protein. Because of this, an early term for GSTs was ligandin. Glutathione S-transferase was originally separated from *Schistosoma japonicum* but currently isolated from recombinant *E. coli* source. Recombinant GST was expressed in *E. coli* and purified by conventional chromatography techniques.
