

Recombinant human Glycine N-methyltransferase/GNMT protein

Catalog Number: GNM0901

PRODUCT INFORMATION

Expression system

E.coli

Domain

1-295aa

UniProt No.

Q14749

NCBI Accession No.

NP_061833

Alternative Names

Glycine N-methyltransferase, GNMT, Glycine N-methyltransferase, Glycine N-methyltransferase EC 2.1.1.20, Glycine N methyltransferase.

PRODUCT SPECIFICATION

Molecular Weight

34.9 kDa (315aa) confirmed by MALDI-TOF

Concentration

1mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 20% glycerol

Purity

> 95% by SDS-PAGE

Endotoxin level

< 1 EU per 1ug of protein (determined by LAL method)

Tag

His-Tag

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

Glycine N-methyltransferase, also known as GNMT, catalyzes the synthesis of N-methylglycine (sarcosine) from glycine using S-adenosylmethionine (AdoMet) as the methyl donor. This protein affects DNA methylation by regulating the ratio of S-adenosylmethionine to S-adenosylhomocystine and participates in the detoxification

Recombinant human Glycine N-methyltransferase/GNMT protein

Catalog Number: GNM0901

pathway in liver cells. Also it is reported that GNMT expression is diminished in human hepatocellular carcinoma (HCC). Recombinant human GNMT protein, fused to His-tag at N-terminus, was expressed in E. coli and purified by using conventional chromatography techniques.

DATA

SDS-PAGE

3ug by SDS-PAGE under reducing condition and visualized by coomassie blue stain.

15% SDS-PAGE (3ug)
