## BACKGROUND

---

# Recombinant human SUMO1 protein

Catalog Number: ATGP0301

## Description

SUMO-1, also known as small ubiquitin-related modifier 1, is a member of the SUMO protein family and functions in a manner similar to ubiquitin. However, unlike ubiquitin which targets proteins for degradation, SUMO-1 protein participates in a number of cellular processes, such as nuclear transport, transcriptional regulation, apoptosis, and protein stability. Recombinant human SUMO1 protein was expressed in *E. coli* and purified by using conventional chromatography.
