NKMAXBio We support you, we believe in your research

Recombinant human Nicotinamide N-Methyltransferase/NNMT protein

Catalog Number: ATGP0320

PRODUCT INFORMATION

Expression system
E.coli

Domain
1-264aa

UniProt No.
P40261

NCBI Accession No.
NP_006160

Alternative Names
Nicotinamide N-methyltransferase

PRODUCT SPECIFICATION

Molecular Weight
31.7 kDa (284aa) confirmed by MALDI-TOF

Concentration
1mg/ml (determined by Bradford assay)

Formulation
Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 20% glycerol

Purity
> 95% by SDS-PAGE

Tag
His-Tag

Application
SDS-PAGE

Storage Condition
Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description
NNMT (Nicotinamide N-methyltransferase) belongs to the family of transferases, specifically those transferring one-carbon group methyltransferases. It is predominantly expressed in the liver, and a lower expression is seen in the kidney, lung, skeletal muscle, placenta and heart. NNMT catalyzes the N-methylation of nicotinamide and other pyridines to form pyridinium ions. This activity is important for biotransformation of many drugs and xenobiotic compounds. Recombinant human NNMT protein, fused to His-tag at N-terminus, was expressed in E. coli and purified by using conventional chromatography.
