

Recombinant human PNMT protein

Catalog Number: ATGP0417

PRODUCT INFORMATION

Expression system

E.coli

Domain

1-282aa

UniProt No.

P11086

NCBI Accession No.

NP_002677

Alternative Names

Phenylethanolamine N-methyltransferase, PENT, PNMTase, Noradrenaline-N-methyltransferase, Phenylethanolamine N-methyltransferase

PRODUCT SPECIFICATION

Molecular Weight

30.8 kDa (282aa) confirmed by MALDI-TOF

Concentration

1mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 10% glycerol

Purity

> 95% by SDS-PAGE

Tag

Non-Tagged

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

PNMT, also known as phenylethanolamine N-methyltransferase, is an enzyme found in the adrenal medulla that catalyzes the last step of the catecholamine biosynthesis pathway, which methylates norepinephrine to form epinephrine (adrenaline). The enzyme also has beta-carboline 2N-methyltransferase activity. This gene is thought to play a key step in regulating epinephrine production. Recombinant PNMT protein was expressed in E. coli and purified by using conventional chromatography techniques.
