

Recombinant human GAMT protein

Catalog Number: ATGP0424

PRODUCT INFORMATION

Expression system

E.coli

Domain

1-236aa

UniProt No.

Q14353

NCBI Accession No.

NP_000147

Alternative Names

Guanidinoacetate N-methyltransferase isoform a, PIG2, TP53I2, Guanidinoacetate N-methyltransferase isoform a
Guanidinoacetate N methyltransferase.

PRODUCT SPECIFICATION

Molecular Weight

28.4 kDa (256aa) confirmed by MALDI-TOF

Concentration

1mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 1mM DTT,10% glycerol

Purity

> 95% by SDS-PAGE

Tag

His-Tag

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

Guanidinoacetate N-methyltransferase isoform a, also known as GAMT is a methyltransferase that converts guanidoacetate to creatine, using S-adenosylmethionine as the methyl donor. This enzyme participates in the two-step synthesis of the compound creatine from the protein building blocks glycine, arginine, and methionine. It is involved in providing energy for muscle contraction, and is also important in nervous system functioning. Also GAMT is active in the liver, pancreas, and kidneys. Recombinant human GAMT, fused to His-tag at N-

Recombinant human GAMT protein

DATA

SDS-PAGE

3ug by SDS-PAGE under reducing condition and visualized by coomassie blue stain.
