

Recombinant human Thymidylate synthase/TYMS protein

Catalog Number: ATGP0446

PRODUCT INFORMATION

Expression system

E.coli

Domain

1-313aa

UniProt No.

P04818

NCBI Accession No.

NP_001062

Alternative Names

HST422, TMS, TS, dTMP synthase, EC 2.1.1.45, MGC88736, Thymidylate synthase, Thymidylate synthetase, Tsase, TYMS, TYMS protein, Tyms thymidylate synthetase,

PRODUCT SPECIFICATION

Molecular Weight

37.8 kDa (333aa) confirmed by MALDI-TOF

Concentration

1mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 10% glycerol, 1mM DTT, 0.1 M NaCl.

Purity

> 95% by SDS-PAGE

Tag

His-Tag

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

Thymidylate synthase is an intracellular enzyme critical for de novo synthesis of DNA. This function maintains the dTMP (thymidine-5-prime monophosphate) pool critical for DNA replication and repair. In cancer, expression of this protein is often elevated and becomes further elevated as a result of treatment with the most commonly used chemotherapeutic, 5-fluorouracil (5-Fu). Resistance or lack of response to 5-Fu is attributed to the elevation of thymidylate synthase activity. Recombinant human Thymidylate synthase protein, fused to His-tag at N-
