

Recombinant human PARP protein

Catalog Number: ATGP0469

PRODUCT INFORMATION

Expression system

E.coli

Domain

662-1014aa

UniProt No.

P09874

NCBI Accession No.

AAH37545.1

Alternative Names

Poly (ADP-ribose) polymerase family member 1, ADPRT, ADPRT1, pADPRT, pADPRT-1, PARP, PARP-1, PPOL, Poly (ADP-ribose) polymerase family, member 1 ADP ribosyltransferase (NAD⁺, poly (ADP ribose) polymerase), ADPRT 1, msPARP, NAD(+) ADP ribosyltransferase 1, pADPRT 1, PARP 1, PARP1, Poly (ADP ribose) polymerase 1, poly(ADP ribose) synthetase, poly(ADP ribosyl)transferase, Poly[ADP ribose] synthetase 1, sPARP 1, sPARP1.

PRODUCT SPECIFICATION

Molecular Weight

39.6 kDa (354aa) confirmed by MALDI-TOF

Concentration

1mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 10% glycerol 1mM DTT

Purity

> 95% by SDS-PAGE

Tag

Non-Tagged

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

PARP1 is a nuclear DNA-binding zinc finger protein which can exist as a homo- or hetero-dimer, and is strongly activated by DNA strand breaks. This protein involved in chromatin architecture and DNA metabolism, and participates in protein modification to enhance or repress transcription. PARP1 also plays a role in other cellular

Recombinant human PARP protein

Catalog Number: ATGP0469

processes, including cell proliferation and differentiation. PARP-1 deficiencies lead to chromosomal instability due to higher frequencies of chromosome fusions and aneuploidy, suggesting that poly (ADPribose) ation contributes to the efficient maintenance of genome integrity. Recombinant PARP1 protein was expressed in *E. coli* and purified by using conventional chromatography techniques.
