BACKGROUND

Description

S100-A9, also known as Calgranulin B, belongs to the S100 family containing EF-hand type Ca²⁺-binding

Recombinant human S100A9 protein

Catalog Number: ATGP0543

proteins. It is involved in the regulation of a number of cellular processes such as cell cycle progression and differentiation, and associated with the disease cystic fibrosis. S100A9 has been implicated in the abnormal differentiation of myeloid cells in the stroma of cancer. This protein may function in the inhibition of casein kinase. Recombinant S100A9 protein, fused to His-tag at C-terminus, was expressed in E. coli and purified by using conventional chromatography techniques.
