

Recombinant human Secretagogin protein

Catalog Number: ATGP0722

PRODUCT INFORMATION

Expression system

E.coli

Domain

1-276aa

UniProt No.

O76038

NCBI Accession No.

NP_008929

Alternative Names

Secretagogin, CALBL, DJ501N12.8, SECRET, SEGN, setagin, Secretagogin

PRODUCT SPECIFICATION

Molecular Weight

34.2 kDa (296aa) confirmed by MALDI-TOF

Concentration

1mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 10% glycerol, 1mM DTT, 0.1M NaCl.

Purity

> 90% by SDS-PAGE

Tag

His-Tag

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

SCGN, also known as secretagogin, is a cytoplasmic protein that contains six EF-hand domains and is related to the calcium-binding proteins Calretinin and Calbindin D28K. This protein is thought to be involved in cell proliferation and KCl (potassium chloride) -mediated calcium flux events. Through its interaction with KCl and its subsequent ability to modulate calcium storage pools within the cell, SCGN may function to negatively control growth and differentiation rates and, thus, indirectly inhibit cell replication. Recombinant SCGN protein, fused to His-tag at N-terminus, was expressed in E. coli and purified by using conventional chromatography techniques.
