NKMAXBio we support you, we believe in your research Recombinant human Aldo-keto reductase 1D1/AKR1D1 protein

Catalog Number: ATGP0953

## **PRODUCT INFORMATION**

**Expression system** E.coli

**Domain** 1-326aa

**UniProt No.** P51857

NCBI Accession No. NP\_005980.1

Alternative Names

Aldo-keto reductase family 1 member D1, SRD5B1, Delta 4-3-ketosteroid-5-beta-reductase

# **PRODUCT SPECIFICATION**

**Molecular Weight** 39.5 kDa (346aa) confirmed by MALDI-TOF

**Concentration** 0.5mg/ml (determined by Bradford assay)

#### Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 1mM DTT, 20% glycerol, 100mM NaCl

Purity

> 90% by SDS-PAGE

**Tag** His-Tag

Application SDS-PAGE

## **Storage Condition**

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

## BACKGROUND

#### Description

Aldo-keto reductase family 1, member D1, also known as AKR1D1, is a member of the AKR superfamily. The AKR family of proteins are soluble NADPH oxidoreductases. They play important roles in the metabolism of drugs, carcinogens and reactive aldehydes. AKR1D1 is responsible for the catalysis of the 5-beta-reduction of bile acid intermediates and steroid hormones which carry a delta (4) -3-one structure. AKR1D1 is highly expressed in liver, colon and testis. Deficiency of this enzyme may contribute to hepatic dysfunction. Recombinant human AKR1D1 protein, fused to His-tag at N-terminus, was expressed in E. coli and purified by using conventional

Catalog Number: ATGP0953

chromatography techniques.

## DATA

#### SDS-PAGE

3ug by SDS-PAGE under reducing condition and visualized by coomassie blue stain.
