

Recombinant human S100A16 protein

Catalog Number: ATGP1018

PRODUCT INFORMATION

Expression system

E.coli

Domain

1-103aa

UniProt No.

Q96FQ6

NCBI Accession No.

NP_525127

Alternative Names

S100 calcium binding protein A16, AAG13, S100F

PRODUCT SPECIFICATION

Molecular Weight

13.9 kDa (123aa) confirmed by MALDI-TOF

Concentration

1mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 1mM DTT, 40% glycerol, 0.2M NaCl

Purity

> 95% by SDS-PAGE

Tag

His-Tag

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

S100 calcium binding protein A16, also known S100A16, is a member of the S100 family of proteins containing 2 EF-hand calcium-binding motifs. S100 proteins are localized in the cytoplasm and nucleus of a wide range of cells, and involved in the regulation of a number of cellular processes such as cell cycle progression and differentiation. Intracellularly, S100A16 is both nuclear and cytoplasmic and apparently exists as a homodimer, trimer and tetramer. It contains two EF-hand motifs with only one high-affinity Ca-binding site and apparently undergoes phosphorylation at Ser103. Recombinant human S100A16 protein, fused to His-tag at N-terminus,

Recombinant human S100A16 protein

Catalog Number: ATGP1018

was expressed in E. coli and purified by using conventional chromatography techniques.
