

# Recombinant human Galectin-10/LGALS10 protein

Catalog Number: ATGP1034

## PRODUCT INFORMATION

---

### Expression system

E.coli

### Domain

1-142aa

### UniProt No.

Q05315

### NCBI Accession No.

NP\_001819

### Alternative Names

Lysolecithin acylhydrolase, LPPL, LGALS10A, LGALS10, Lectin galactoside-binding soluble, Galectin 10, Gal-10, Eosinophil lysophospholipase, CLC, Charcot-Leyden crystal protein, 10LGALS10A

## PRODUCT SPECIFICATION

---

### Molecular Weight

18.6 kDa (162aa) confirmed by MALDI-TOF

### Concentration

0.5mg/ml (determined by Bradford assay)

### Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 1mM DTT, 10% glycerol, 0.1M NaCl

### Purity

> 90% by SDS-PAGE

### Tag

His-Tag

### Application

SDS-PAGE

### Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

## BACKGROUND

---

### Description

Eosinophil lysophospholipase (CLC), also known as Galectin 10, act on biological membranes to regulate the multifunctional lysophospholipids. CLC is a lysophospholipase expressed in eosinophils and basophils. It hydrolyzes lysophosphatidylcholine to glycerophosphocholine and a free fatty acid. This protein may possess carbohydrate or IgE-binding activities. It is both structurally and functionally related to the galectin family of beta-galactoside binding proteins. It may be associated with inflammation and some myeloid leukemias.

# Recombinant human Galectin-10/LGALS10 protein

Catalog Number: ATGP1034

Recombinant human CLC protein, fused to His-tag at N-terminus, was expressed in E. coli and purified by using conventional chromatography techniques.

## DATA

---

### SDS-PAGE

3ug by SDS-PAGE under reducing condition and visualized by coomassie blue stain.

15% SDS-PAGE (3ug)
