

Recombinant human MafG protein

Catalog Number: ATGP1268

PRODUCT INFORMATION

Expression system

E.coli

Domain

1-162aa

UniProt No.

O15525

NCBI Accession No.

NP_116100.2

Alternative Names

Transcription factor MafG, hMAF, MAFG, V-maf musculoaponeurotic fibrosarcoma oncogene homolog G

PRODUCT SPECIFICATION

Molecular Weight

20 kDa (182aa) confirmed by MALDI-TOF

Concentration

0.25mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 40% glycerol, 0.15M NaCl, 1mM DTT

Purity

> 90% by SDS-PAGE

Tag

His-Tag

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

MAFG, also known as transcription factor MafG, belongs to the Maf family. Since they lack a putative transactivation domain, the small Mafs behave as transcriptional repressors when they dimerize among themselves. However, they seem to serve as transcriptional activators by dimerizing with other (usually larger) basic-zipper proteins and recruiting them to specific DNA-binding sites. Small Maf proteins heterodimerize with Fos and may act as competitive repressors of the NF-E2 transcription factor. Recombinant human MAFG protein, fused to His-tag at N-terminus, was expressed in E. coli and purified by using conventional chromatography.
