BACKGROUND

Description

NFKB inhibitor interacting Ras-like 2 (NKIRAS2), also known as KBRAS2, is similar to the Ras-like small GTPases that associate with I κ B. These Ras-like proteins, NKIRAS1 and NKIRAS2, interact with the PEST domains of I κ B alpha and I κ B beta and decrease their rate of degradation. NKIRAS2 shows 71% identity to KBRAS1. NKIRAS2 is an inhibitor of the transcription factor NF- κ B. Recombinant human NKIRAS2 protein, fused to His-tag at N-terminus, was expressed in E. coli and purified by using conventional chromatography techniques.
