

Recombinant human Phospholipid Scramblase 1/PLSCR1 protein

Catalog Number: ATGP1793

PRODUCT INFORMATION

Expression system

E.coli

Domain

1-288aa

UniProt No.

O15162

NCBI Accession No.

NP_066928.1

Alternative Names

Phospholipid scramblase 1, MMTRA1B

PRODUCT SPECIFICATION

Molecular Weight

33.8 kDa (308aa) confirmed by MALDI-TOF

Concentration

0.5mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 0.2M NaCl, 30% glycerol, 1mM DTT

Purity

> 85% by SDS-PAGE

Tag

His-Tag

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

Phospholipid scramblase 1, also known as PLSCR1, may play a role in the antiviral response of interferon (IFN) by amplifying and enhancing the IFN response through increased expression of select subset of potent antiviral genes. This protein may contribute to cytokine-regulated cell proliferation and differentiation. Recombinant human PLSCR1 protein, fused to His-tag at N-terminus, was expressed in E. coli and purified by using conventional chromatography techniques.

DATA

SDS-PAGE

3 μ g by SDS-PAGE under reducing condition and visualized by coomassie blue stain.
