# Recombinant human HADHB protein

Catalog Number: ATGP2941

#### **PRODUCT INFORMATION**

# **Expression system**

E.coli

#### **Domain**

34-474aa

#### UniProt No.

P55084

#### **NCBI Accession No.**

NP 000174

#### **Alternative Names**

Trifunctional enzyme subunit beta mitochondrial, Trifunctional enzyme subunit beta, mitochondrial, ECHB, MSTP029, MTPB, TP-BETA

## **PRODUCT SPECIFICATION**

# **Molecular Weight**

49.9 kDa (464aa)

## **Concentration**

0.5mg/ml (determined by Bradford assay)

#### **Formulation**

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 10% glycerol

#### **Purity**

> 90% by SDS-PAGE

#### Tag

His-Tag

# **Application**

SDS-PAGE, Denatured

### **Storage Condition**

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

## **BACKGROUND**

# Description

HADHB is the beta subunit of the mitochondrial trifunctional protein, which catalyzes the last three steps of mitochondrial beta-oxidation of long chain fatty acids. The mitochondrial membrane-bound heterocomplex is composed of four alpha and four beta subunits, with the beta subunit catalyzing the 3-ketoacyl-CoA thiolase activity. This protein can also bind RNA and decreases the stability of some mRNAs. The genes of the alpha and beta subunits of the mitochondrial trifunctional protein are located adjacent to each other in the human genome

# Recombinant human HADHB protein

Catalog Number: ATGP2941

in a head-to-head orientation. Mutations in this gene result in trifunctional protein deficiency. Recombinant human HADHB protein, fused to His-tag at N-terminus, was expressed in E. coli.
