

Recombinant human Prostatic Acid Phosphatase/ACPP protein

Catalog Number: ATGP2956

PRODUCT INFORMATION

Expression system

E.coli

Domain

33-386aa

UniProt No.

P15309

NCBI Accession No.

AAH08493

Alternative Names

Acid phosphatase prostate, Acid phosphatase, prostate, PAP, ACP3, ACP-3

PRODUCT SPECIFICATION

Molecular Weight

43.2 kDa (375aa)

Concentration

0.5mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 10% glycerol

Purity

> 85% by SDS-PAGE

Tag

His-Tag

Application

SDS-PAGE, Denatured

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

ACPP, also known as Acid phosphatase, prostate. ACPP is a non-specific tyrosine phosphatase that dephosphorylates a diverse number of substrates under acidic conditions (pH 4-6) including alkyl, aryl, and acyl orthophosphate monoesters and phosphorylated proteins. It has lipid phosphatase activity and inactivates lysophosphatidic acid in seminal plasma. Recombinant human ACPP, fused to His-tag at N-terminus, was expressed in E. coli.
