

Recombinant mouse CD36/SR-B3 protein

Catalog Number: ATGP3210

PRODUCT INFORMATION

Expression system

Baculovirus

Domain

30-439aa

UniProt No.

Q08857

NCBI Accession No.

NP_031669

Alternative Names

Cd36, CD36 antigen, FAT, GPIV, Scarb3

PRODUCT SPECIFICATION

Molecular Weight

47.4 kDa (419aa)

Concentration

1mg/ml (determined by absorbance at 280nm)

Formulation

Liquid in. Phosphate-Buffered Saline (pH 7.4) containing 10% glycerol

Purity

> 95% by SDS-PAGE

Endotoxin level

< 1 EU per 1ug of protein (determined by LAL method)

Tag

His-Tag

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

CD36, also known as platelet glycoprotein 4, is an integral membrane glycoprotein that has multiple physiological functions. It is broadly expressed on a variety of cell types. As a member of the scavenger receptor family, CD36 is a multiligand pattern recognition receptor that interacts with a large number of structurally dissimilar ligands. It plays a role in lipid metabolism and has been identified as a fatty acid translocase

Recombinant mouse CD36/SR-B3 protein

Catalog Number: ATGP3210

necessary for the binding and transport of LCFA in cells and tissues. It also plays a significant role in the initiation and pathogenesis of chronic inflammatory diseases such as Alzheimer's disease and atherosclerosis. It is an integral membrane protein primarily serving as receptors for thrombospondin and collagen and by the erythrocytes infected with the human malaria parasite. Recombinant mouse CD36, fused to His-tag at C-terminus, was expressed in insect cell and purified by using conventional chromatography techniques.
