

Recombinant mouse Galectin-2/LGALS2 protein

Catalog Number: ATGP3247

PRODUCT INFORMATION

Expression system

E.coli

Domain

1-130aa

UniProt No.

Q9CQW5

NCBI Accession No.

NP_079898

Alternative Names

Galectin 2, 2200008F12Rik, AI324147, Gal-2

PRODUCT SPECIFICATION

Molecular Weight

17.3 kDa (153aa) confirmed by MALDI-TOF

Concentration

1mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 0.1M NaCl, 10% glycerol, 1mM DTT

Purity

> 95% by SDS-PAGE

Biological Activity

The ED50 for this effect is equal or higher than 20ug/ml. Measured by its ability to agglutinate human red blood cells.

Tag

His-Tag

Application

SDS-PAGE, Bioactivity

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

Galectin 2, also known as Lgals2, belongs to the galectins family. Galectins are a family of soluble beta-galactoside-binding animal lectins that modulate cell-to-cell adhesion and cell-to-extracellular matrix (ECM) interactions and play a role in tumor progression, pre-mRNA splicing and apoptosis. Lgals2 is a monomeric or

Recombinant mouse Galectin-2/LGALS2 protein

Catalog Number: ATGP3247

homodimeric prototype galectin that is expressed in hepatoma, stomach epithelial cells and in colorectal and neural tumors. It induces apoptosis in activated T cells and binds to the cytokine lymphotoxin-a (LTA) with possible implications in risk of myocardial infarction. Human and mouse Lgals2 share approximately 65% amino acid sequence similarity. Recombinant Mouse Lgals2 protein, fused to His-tag at N-terminus, was expressed in E. coli and purified by using conventional chromatography techniques.
