

Recombinant mouse Tyrosine Hydroxylase protein

Catalog Number: ATGP3438

PRODUCT INFORMATION

Expression system

Baculovirus

Domain

1-498aa

UniProt No.

P24529

NCBI Accession No.

NP_033403.1

Alternative Names

Tyrosine 3-monooxygenase, Th, tyrosine hydroxylase

PRODUCT SPECIFICATION

Molecular Weight

57 kDa (507aa)

Concentration

0.25mg/ml (determined by absorbance at 280nm)

Formulation

Liquid in. Phosphate-Buffered Saline (pH 7.4) containing 10% glycerol

Purity

> 90% by SDS-PAGE

Endotoxin level

< 1 EU per 1ug of protein (determined by LAL method)

Tag

His-Tag

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

Th, also known as tyrosine 3-monooxygenase, is a rate-limiting enzyme in catecholamine synthesis. It uses tetrahydrobiopterin and molecular oxygen to convert tyrosine to DOPA. It regulates dopamine (DA) neurotransmission at the biosynthesis and reuptake steps. It plays an important role in the physiology of adrenergic neurons. It effects overexpression in lymphocytes on the differentiation and function of T helper cells.

Recombinant mouse Tyrosine Hydroxylase protein

Catalog Number: ATGP3438

Recombinant mouse Th, fused to His-tag at C-terminus, was expressed in insect cell and purified by using conventional chromatography techniques.

DATA

SDS-PAGE

3ug by SDS-PAGE under reducing condition and visualized by coomassie blue stain.
