Recombinant human EphB2 protein

Catalog Number: ATGP3493

PRODUCT INFORMATION

Expression system
Baculovirus

Domain
19-543aa

UniProt No.
P29323

NCBI Accession No.
NP_059145

Alternative Names
EPH receptor B2, Ephrin type-B receptor 2, EPHB2, Developmentally-regulated Eph-related tyrosine kinase, ELK-related tyrosine kinase, EPH tyrosine kinase 3, EPH-like kinase 5, EK5, hEK5, Renal carcinoma antigen NY-REN-47, Tyrosine-protein kinase TYRO5, Tyrosine-protein kinase receptor EPH-3, DRT, EPHT3, EPTH3, ERK, HEK5, TYRO5

PRODUCT SPECIFICATION

Molecular Weight
59.1 kDa (533aa)

Concentration
0.5mg/ml (determined by absorbance at 280nm)

Formulation
Liquid in. Phosphate-Buffered Saline (pH 7.4) containing 20% glycerol, 1mM DTT

Purity
> 90% by SDS-PAGE

Endotoxin level
< 1 EU per 1ug of protein (determined by LAL method)

Biological Activity
Measured by its binding ability in a functional ELISA with Human Ephrin-B1 (CAT# ATGP3800)

Tag
His-Tag

Application
SDS-PAGE, Bioactivity

Storage Condition
Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

Recombinant human EphB2 protein

Catalog Number: ATGP3493

BACKGROUND

Description

EPHB2, also known as ephrin type-B receptor 2 isoform 1, is a member of the transmembrane Eph receptor tyrosine kinase family (RTKs) that binds members of the Ephrin family on adjacent cells. The interaction triggers forward signaling in the receptor-expressing cells through the Eph receptor and reverse signaling in the ligand-expressing cells through Ephrin. Hippocampal neurons can release vesicles containing full length EPHB2, and these are taken up by neighboring glial cells. This protein controls axon guidance across the embryonic midline, promotes a neuronal fate from neural precursors, and regulates NMDA receptor activity. Recombinant human EPHB2, fused to His-tag at C-terminus, was expressed in insect cell and purified by using conventional chromatography techniques.

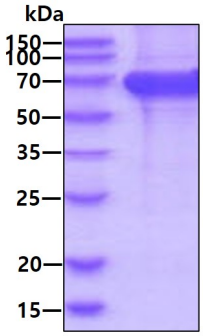
DATA

SDS-PAGE

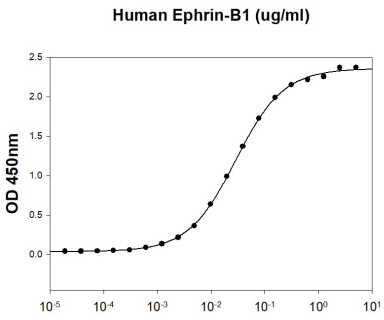


3ug by SDS-PAGE under reducing condition and visualized by coomassie blue stain

Biological Activity

Recombinant human EphB2 protein

Catalog Number: ATGP3493



Human EphB2 is coated at 2 ug/ml (100 ul/well) can bind Human Ephrin-B1 (CAT# ATGP3800) in a Functional ELISA assay.
