Recombinant mouse TNF-alpha protein

Catalog Number: ATGP3651

BACKGROUND

Description

TNF α , also known as tumor necrosis factor, binds to TNFRSF1A/TNFR1 and TNFRSF1B/TNFR. It is mainly secreted by macrophages and can induce cell death of certain tumor cell lines. It is potent pyrogen causing fever by direct action or by stimulation of interleukin-1 secretion and is implicated in the induction of cachexia. Recombinant mouse TNF α protein was expressed in *E. coli* and purified by using conventional chromatography.
