

Recombinant human CD81 protein

Catalog Number: ATGP3661

PRODUCT INFORMATION

Expression system

Baculovirus

Domain

113-201aa

UniProt No.

P60033

NCBI Accession No.

NP_004347.1

Alternative Names

CD81 antigen isoform 1, CD81, CVID6, S5.7, TAPA1, TSPAN28

PRODUCT SPECIFICATION

Molecular Weight

37 kDa (331aa)

Concentration

0.5mg/ml (determined by absorbance at 280nm)

Formulation

Liquid in. Phosphate-Buffered Saline (pH 7.4) containing 10% glycerol

Purity

> 95% by SDS-PAGE

Endotoxin level

< 1 EU per 1ug of protein (determined by LAL method)

Tag

hIgG-His-Tag

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

CD81, also known as CD81 antigen isoform 1, belongs to the tetraspanin family. It interacts directly with immunoglobulin superfamily member 8 (IGSF8, CD316) and CD36. In B cells, it is part of a complex with CD21, CD19 and Leu13. This complex reduces the threshold for B cell activation through B cell receptors by linking Ag specific recognition and CD21 mediator recognition. On T cells it associates with CD4 and CD8 and provides a

Recombinant human CD81 protein

costimulatory signal with CD3. Recombinant human CD81, fused to hIlgG-His-tag at C-terminus, was expressed in insect cell and purified by using conventional chromatography techniques.
