

# Recombinant human MS4A1/CD20 protein

Catalog Number: ATGP3734

## PRODUCT INFORMATION

---

### Expression system

Baculovirus

### Domain

210-297aa

### UniProt No.

P11836

### NCBI Accession No.

NP\_068769

### Alternative Names

B-lymphocyte antigen CD20, MS4A1, B1, Bp35, CD20, CVID5, LEU-16, MS4A2, S7

## PRODUCT SPECIFICATION

---

### Molecular Weight

11.1 kDa (97aa)

### Concentration

0.5mg/ml (determined by absorbance at 280nm)

### Formulation

Liquid in. Phosphate-Buffered Saline (pH 7.4) containing 10% glycerol

### Purity

> 90% by SDS-PAGE

### Endotoxin level

< 1 EU per 1ug of protein (determined by LAL method)

### Tag

His-Tag

### Application

SDS-PAGE

### Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

## BACKGROUND

---

### Description

MS4A1, also known as B-lymphocyte antigen CD20, is an activated-glycosylated phosphoprotein expressed on the surface of all B-cells beginning at the pro-B phase and progressively increasing in concentration until maturity. It is to enable optimal B-cell immune response, specifically against T-independent antigens. It is suspected that it acts as a calcium channel in the cell membrane. It plays a role in the microenvironmental

# Recombinant human MS4A1/CD20 protein

interactions of B cells. This structurally unique phosphoprotein plays a role in the regulation of human B cell proliferation and differentiation. It was strongly phosphorylated on resting B cells after CDw40 stimulation, suggesting that it may be functionally regulated by a protein kinase. Recombinant human MS4A1, fused to His-tag at C-terminus, was expressed in insect cell and purified by using conventional chromatography techniques.

## DATA

### SDS-PAGE

3ug by SDS-PAGE under reducing condition and visualized by coomassie blue stain.
